

SOUTHERN UTE INDIAN TRIBE

DEPARTMENT OF ENERGY

September 10, 2020

Subject: Notice to Operators – DOE Wildfire Response Process.

Dear Operators and Right of Way Holders,

This letter is a Notice to Operators to inform you that the Southern Ute Indian Tribe's (SUIT) Department of Energy (DOE) is developing a wildfire response process that will allow DOE to make timely and accurate notifications to operators with regards to wildfires that are on/adjacent to tribal land and that may threaten energy related resources. DOE is asking that each operator provide DOE with the name, phone number and email address of three people (or group email) from your company that will be the point of contact for the notification. The process will be used for initial notification purposes only. It is up to the individual company to decide if and how to respond to the threat of wildfire. It is also up each company to keep SUIT DOE up to date if the company point of contacts change. Additional information will be provided to all operators once this process has been fully established.

Sincerely;

Michael J Matheson

Michael Matheson, P.G.

Energy Manager

Southern Ute Department of Energy
